PROPRIETARY PLATFORM

Continu-US · Continuous Control Verification

Our in-house platform turns compliance from a point-in-time scramble into continuous, real-time evidence. It verifies technical controls against the framework you choose, or your own baseline, on a daily, weekly or custom cadence, and tracks findings and POA&Ms. Evidence is pulled from your ticketing system, SIEM, firewalls, switches and cloud tenants.

- ▶ Real-time, hash-verified evidence
- ▶ Built-in: NIST 800-171, 800-53 Rev 5, PCI DSS 4.0.1
- ▶ Customizable to any framework or your own baseline
- ▶ Included in our MSSP service; licensable

WHY CLIENTS CHOOSE ATLLC

- Assessor or implementer, never both: we never assess a client we consult for or manage, so every assessment stays independent
- Proven results: our MSSP clients have successfully completed CMMC Level 2 assessments
